**Solution Architecture:**

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- **We have to find the best technology solution to solve existing business problems.**
- **Describe the structure, characteristics, behaviour, and other aspects of the software to project stakeholders.**
- **Define features, development phases, and solution requirements.**
- **Provide specifications according to which the solution is defined, managed, and delivered.**
